Company Onboarding, SRS Study, and Development Environment Setup

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	Company Onboarding & Team Introduction: Meeting the existing development team and gaining access to the project repository and tools. SRS Document Review: Studying the 44-page Software Requirements Specification for the StayEasy multi-tenant SaaS platform.	2026/06/15	2026/06/20	
2	Development Environment Setup: Installing and configuring Android Studio with SDK, emulator, and project dependencies. Build Issue Resolution: Troubleshooting and resolving Gradle build errors during initial project setup.	2026/06/16	2026/06/20	
3	System Architecture Study: Understanding multi-tenant SaaS architecture including database schema and API design. Framework Research: Studying React Native and Expo framework fundamentals for mobile application development.	2026/06/17	2026/06/20	
4	UI/UX Team Expansion: A new UI/UX designer from Gandaki University joined the team for mobile app branding. Competitor Analysis: Reviewing mobile applications from Airbnb, Booking.com, and Agoda for design reference.	2026/06/18	2026/06/20	
5	Technology Stack Decision: Receiving supervisor recommendation to shift from Android Studio to React Native with Expo. Web Codebase Exploration: Beginning study of existing React JS web codebase to understand component patterns.	2026/06/19	2026/06/20	
6	Web Application Analysis: Studying authentication flow, booking workflow, and search functionality. Tools Setup: Installing VS Code, Node.js, and Expo CLI for React Native development.	2026/06/20	2026/06/20

React Native Environment Setup and First Mobile App Implementation

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	Expo Project Initialization: Creating first Expo project and testing deployment on Redmi 10 Prime using Expo Go. React Native Fundamentals: Learning core components - View, Text, TextInput, TouchableOpacity, and StyleSheet.	2026/06/22	2026/06/27	
2	Project Structure Setup: Establishing folder structure with app/, components/, lib/, constants/ directories. Login Screen Porting: Translating React JS web login screen to React Native native components.	2026/06/23	2026/06/27	
3	Registration & OTP Implementation: Developing registration and OTP verification screens connecting to FastAPI backend. API Integration: Performing first successful API call using fetch() for user registration.	2026/06/24	2026/06/27	
4	Home Screen Development: Building home screen with search bar and property card components. Image Loading: Resolving React Native Image component URI format for external image URLs.	2026/06/25	2026/06/27	
5	Backend API Connection: Connecting home screen to live backend search endpoint for real property data. Data Mapping: Implementing mapper function for backend response format conversion.	2026/06/26	2026/06/27	
6	Sprint Planning: Attending team meeting and receiving assignment for Guest portal booking flow. Project Rebranding: Noting official rename from StayEasy to ServeIQ due to domain issues.	2026/06/27	2026/06/27

Guest Portal Booking Flow Implementation and Feature Development

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	Room Selection Interface: Developing room selection screen with type, bed configuration, price, and amenities. Backend Integration: Connecting to available-rooms endpoint for real-time room availability data.	2026/06/29	2026/07/04	
2	Initial Repository Commit: Making first commit with all developed screens and components. Guest Details Form: Implementing guest information collection with form validation logic.	2026/06/30	2026/07/04	
3	Feature Sprint: Implementing checkout timer, discount codes, urgency badge, search filters, and cancellation policy. Image Integration: Adding real hotel images from Unsplash API for property display.	2026/07/01	2026/07/04	
4	Code Review: Participating in supervisor review identifying 3 issues - styling, navigation, and validation. Bug Resolution: Fixing all identified issues and updating mock data with Nepal-specific hotels.	2026/07/02	2026/07/04	
5	Hotel Detail Enhancement: Adding room cards, amenity icons, and photo gallery to detail page. Performance: Implementing image lazy loading for improved search results performance.	2026/07/03	2026/07/04	
6	Host Portal Initiation: Creating portal picker with 4 cards and Host login screen. Portal Auth: Implementing separate AsyncStorage keys for independent portal sessions.	2026/07/04	2026/07/04

Host Portal Development and Operations Module Implementation

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	Host Dashboard: Building dashboard with stat cards, recent bookings, and quick actions. Property List: Developing property card layout connected to backend /properties endpoint.	2026/07/05	2026/07/10	
2	Listing Wizard: Implementing 5-step property creation with validation and progress indicator. Code Assessment: Documenting 2,400+ line wizard file for future refactoring.	2026/07/06	2026/07/10	
3	CRUD Operations: Implementing property, room, and discount code create/read/update/delete. Validation: Adding price validation and completing project rename from StayEasy to ServeIQ.	2026/07/07	2026/07/10	
4	Front Desk Module: Developing room grid with real-time status display and check-in/out flows. State Management: Creating FrontDeskContext with 18 rooms across 3 floors.	2026/07/08	2026/07/10	
5	Housekeeping Module: Building task queue with status flow and cleaner assignment. POS Integration: Adding basic floor plan view with table status display.	2026/07/09	2026/07/10	
6	Project Cleanup: Removing unused Express/tRPC server code and Drizzle ORM files. TypeScript Check: Confirming zero errors following project restructure.	2026/07/10	2026/07/10

Manual QA Testing on ServalQ Mobile Application and Website

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	QA Process Start: Beginning Manual QA testing on ServalQ mobile app and website. Bug Report Template: Creating standardized format with ID, Title, Severity, Steps, and Attachments.	2026/07/12	2026/07/17	
2	Host Portal Testing: Executing test cases on property listing and staff invitation flows. Bug Documentation: Documenting B_001 (phone validation), B_002 (staff photo), B_003 (discount limit).	2026/07/13	2026/07/17	
3	Room & Offer Testing: Testing room management and special offer creation functionality. Validation Issues: Identifying B_004 (duplicate rooms), B_005 (invalid dates), B_006 (keyboard).	2026/07/14	2026/07/17	
4	Website Testing: Transitioning to testing React JS web version built by frontend team. Critical Bugs: Finding B_007 (search 404) and B_008 (current date validation) on web.	2026/07/15	2026/07/17	
5	Payment Testing: Testing Khalti, Stripe, and Razorpay integration flows on web. Payment Bug: Documenting B_010 (Khalti HTTP 400) blocking user payments.	2026/07/16	2026/07/17	
6	Bug Compilation: Organizing all bugs by severity for formal presentation. Research: Beginning payment gateway research for development return.	2026/07/17	2026/07/17

Extended Mobile App Testing and Bug Resolution Tracking

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	Guest Screen Testing: Testing search, hotel detail, and booking workflow interfaces. UX Issues: Documenting layout, map display, notification, and placeholder visibility problems.	2026/07/19	2026/07/24	
2	Profile & Payment Testing: Testing host profile editing and payment functionality. Persistence Issues: Finding profile edits don't reflect in UI, test payment failures.	2026/07/20	2026/07/24	
3	Auth Flow Testing: Testing host login and password management functionality. Session Issues: Identifying temp password recurrence and room data persistence failures.	2026/07/21	2026/07/24	
4	Staff Module Testing: Testing staff forms, phone validation, and property status toggles. Regression: Re-testing B_002 and B_010 to confirm continued failure.	2026/07/22	2026/07/24	
5	Sprint Review: Presenting all bugs to supervisor with severity classifications. Priority: Khalti payment and search 404 designated as production-blocking.	2026/07/23	2026/07/24	
6	Final Report: Compiling bug report organized by High, Medium, Low severity. Preparation: Studying i18next for internationalization implementation.	2026/07/24	2026/07/24

Internationalization Implementation and Payment Gateway Integration

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	i18n Setup: Configuring i18next with 7 languages - English, Nepali, Hindi, French, Spanish, Japanese, Chinese. Translation Files: Creating initial English translations with 200+ keys for auth and booking.	2026/07/26	2026/07/31	
2	Payment SDK: Installing Razorpay and Khalti native payment SDK packages. Profile Navigation: Building profile stack layout with sub-page routing.	2026/07/27	2026/07/31	
3	Auth Screen i18n: Completing translations for login, register, OTP, and password screens. Booking i18n: Applying translation keys to booking and payment confirmation screens.	2026/07/28	2026/07/31	
4	Complete i18n: Applying translations to all tab screens, profile pages, and components. Scroll Restoration: Implementing useScrollRestoration hook for search screens.	2026/07/29	2026/07/31	
5	Translation Finalization: Completing all 7 language files with 1,400+ total keys. Booking Refactor: Splitting 1,254-line booking-flow.tsx into modular files.	2026/07/30	2026/07/31	
6	Code Modularization: Completing booking-flow decomposition into constants, styles, hooks. Quality Check: Confirming zero TypeScript errors and reducing lint warnings.	2026/07/31	2026/07/31	

Gandaki University

Student Name: Aswin Panta

Bug Fixes, Splash Screen Design, and Code Quality Refactoring

University Supervisor

S.N.	Projects/Task worked on this week	Start Date	End Week	Signature of Supervisor
1	Timezone Fix: Resolving Date#toISOString() UTC issue causing incorrect Nepal date display. Pipeline Correction: Fixing booking payment intent order and discount query formatting.	2026/08/02	2026/08/07	
2	Backend Alignment: Connecting guest portal with city rails and nearby search integration. Khalti Integration: Implementing Khalti payment flow with pidx verification.	2026/08/03	2026/08/07	
3	Splash Screen: Creating animated Nepal map with route lines and landmark illustrations. Design Iterations: Completing 10+ revisions based on supervisor feedback.	2026/08/04	2026/08/07	
4	Native SDK Setup: Installing expo-dev-client and Khalti native payment SDK. Payment Verification: Testing complete Khalti flow from booking to backend confirmation.	2026/08/05	2026/08/07	
5	Color Tokenization: Replacing 3,200+ hardcoded hex colors with design tokens. File Modularization: Splitting api.ts into 6 modules and listing-wizard into orchestrator.	2026/08/06	2026/08/07	
6	Feature Demo: Presenting Guest, Host, Housekeeping, and Front Desk modules. Sprint Sign-off: Supervisor approving work before examination period.	2026/08/07	2026/08/07
